

Flanged Static Industrial Mixers, Series 275

Koflo produces a complete line of flanged static mixers made from industrial grade schedules 10 through 40 pipe, in sizes ranging from 3/8"- 60" diameter. All flanged static mixers are custom designed for each application. Koflo stocks all of the raw materials and can produce a flanged industrial mixer in as little as 1-2 days. Standard materials of construction include carbon steel, 304L and 316L stainless steel. Other alloys are available upon request.

Static Mixer Applications

- Chemical blending
- Water treatment
- Crude oil blending
- Custody transfer
- pH control
- Liquid/vapor contacting

Static Mixer Options

- Interior epoxy coatings
- High performance exterior coatings
- Hydro-testing
- Exotic alloys

Element Options

- Low pressure design mixing elements
- Helical mixing elements
- Removable mixing elements
- Flow straightening vanes
- Abrasion resistant mixing elements

Housing Options

- Pipe schedules (80, XH, etc.)
- Flange classes (150 lb., 300 lb., etc.)
- Flange types (Slip On, Weld Neck, etc.)
- Injection ports (FNPT, flanged, etc.)
