Gray PVC Static Mixers, Series 328

Koflo produces a complete line of industrial grade schedule 80 PVC static mixers in sizes ranging from 1/2"- 20". Threaded static mixers from 1/2"- 2", with both 6 and 12 mixing elements, are in stock and available for immediate delivery. Koflo also stocks our most popular 1"- 6" flanged PVC mixers both with and without injection ports. Larger custom designed PVC mixers can be shipped in as little as 1-2 days. Size permitting, all static mixers are both hot air-welded and solvent-cemented into the housing. This method provides both a high strength bond and edge-seals the mixer to the wall to prevent liquid from "slip streaming" around the mixing elements.

Static Mixer Applications

- Polymer Blending
- Water Treatment
- Chemical blending
- pH Control
- Liquid/Gas Blending

Static Mixer Options

- Removable stainless steel mixing elements
- Low-pressure design mixing elements
- Non-clogging mixing elements
- Helical mixing elements
- Chemical injection ports
- Flow straightening vanes
- Clear PVC housings (1/2"- 4")
- CPVC construction
