

Fiberglass Static Mixers, Series 500

Koflo offers a complete line of fiberglass static mixers for applications that require a high degree of corrosion resistance. Each mixer is constructed using the highest quality vinyl ester resin. This will ensure a long service life even under the harshest conditions. All exposed elements are edge sealed to the housing for increased strength and maximum mixing efficiency. (Note: Koflo does not recommend placement of a fiberglass mixer in a steel or ductile iron line. See Series 512). Fiberglass mixers are available in sizes ranging from 6" - 48" and in various pressure ratings.

Applications

- pH Control
- Water treatment
- Chemical blending

Options

- Low pressure loss design elements
- 316L stainless steel elements
- Chemical injection ports
- High temperature resins
