

Projects South Australia

Client City Green Alliance
Site Glenelg to Adelaide Parklands Recycled Water Project
Project Chlorination System
Details Supply of all chlorination equipment (including an emergency gas scrubber) & commissioning assistance. Supply of numerous chlorine analysers, Hach turbidity monitors and calibration/ commissioning assistance

Client SA Water
Site Bolivar WWTP
Project Mawson Lakes Chlorination Facility
Details Equipment supply and commissioning assistance for gas chlorination equipment

Client Waternish Constructions Pty Ltd
Site SA Water
Project Mount Pleasant WTP Polymer Dosing System
Details Design engineering services and equipment supply of polymer dosing system

Client United Water
Site Hope Valley
Project Chlorination System Upgrade
Details Assistance with system design, equipment supply & commissioning support

Client SA Water
Site Penneshaw Desalination Facility
Project Carbon Dioxide Dosing System
Details Design, supply, installation & commissioning of a carbon dioxide dosing system

Client Lower Murray Water
Site Robinvale Water Treatment Plant
Project Sodium Fluoride Chemical Metering System
Details Design, manufacture, installation & commissioning

Inclusion in this list does not constitute an endorsement

Client Leighton Contractors
 Site United Water
 Project Happy Valley ADP Modifications Project
 Details Supply, installation & commissioning of new chlorination equipment
 Design, supply and commissioning of a calgon dosing system

Client SA Water
 Site Mount Pleasant WTP
 Project Sodium Fluoride Dosing System
 Details Design, supply, installation and commissioning of a sodium fluoride dosing system

Client Waternish Constructions Pty Ltd
 Site SA Water
 Project Blue Lake Fluoridation Facility
 Details Design engineering services, equipment supply including Electrical Control Panel incorporating PLC logic & HMI, PLC programming and commissioning assistance of sodium fluoride dosing infrastructure

Client United Water
 Site Wattle Park
 Project Chlorination System Upgrade
 Details Equipment supply

Client United Utilities Australia Pty Ltd
 Site Victor Harbour WWTP Disinfection Enhancement Project
 Project Gaseous Chlorination Module
 Details Design, supply and commissioning of chlorination module, incorporating duty/stand-by chlorinators, 4 x 920kg drum supply with track and trolley system, electrical control panel with Alan Bradley PLC incorporating HMI, PLC programming and 12.6 long by 3.3m wide insulated panel building
